CLASS OF 2022

MASTER OF ADVANCED STUDIES
IN SPORT ADMINISTRATION & TECHNOLOGY

AISTS MASTER IN SPORT MANAGEMENT AND TECHNOLOGY

A FULL-TIME PROGRAM IN THE OLYMPIC CAPITAL

Organised by the International Academy of Sport Science and Technology (AISTS), the AISTS MAS in Sport Administration and Technology degree is a unique postgraduate program held annually in Lausanne, the Olympic Capital. Over the course of 15 months, participants are trained by experts in sport management and academics, in the following multi-disciplinary fields applied directly to sport:

- Management & Economics
- Technology
- Law
- Sociology
- Medicine

THE NO.1 RANKED PROGRAM IN SPORT MANAGEMENT WORLDWIDE

The AISTS Master of Advanced Studies in Sport Administration and Technology is ranked number 1 in the global Eduniversal rankings and is co-signed by some of the most renowned academic and technology institutes of Switzerland; EPFL, University of Lausanne and University of Geneva.

The AISTS MAS in Sport Administration and Technology is designed for sports-minded professionals wishing to achieve a stronger skill set for their existing or desired career in the sport industry.

Participants are fluent in English, have an undergraduate degree, a master's degree and/or work experience, and are interested in developing or strengthening a career in sport management. In addition, they come from a wide range of nationalities and professions, but all have the same goal to become a future leader in sport.

AISTS MAS WORK EXPERIENCE REQUIREMENTS

To gain the Master from AISTS, participants must pass all academic parts of the course but must also complete at least eight weeks of full-time work in the sport industry. Past participants have completed these requirements in the form of short-term work experience or by securing full-time jobs with organisations such as the International Olympic Committee, International Federations, sport organisations, organising committees and corporate agencies.

ABOUT THE AISTS

The AISTS was founded in 2000 by the International Olympic Committee (IOC), EPFL, University of Lausanne, University of Geneva, IMD Business School, Ecole Hôtelière de Lausanne (EHL), the City of Lausanne and the Canton of Vaud.

The AISTS responds to the needs of the sport industry by focusing its activity on three key pillars:

EDUCATION

Educating leaders in sport management through adapted education programs.

APPLIED RESEARCH

Providing knowledge and expertise in relevant fields applied to the sport environment.

CONNECTIONS

Acting as a strategic connector in the world of sport.

AISTS MISSION

The primary mission of the AISTS is to master sport by positively contributing to sport management through a multi-disciplinary approach to education and sciences by remaining at the forefront of the sport industry's development and the Olympic Movement.

FROM THE FIELD

RALPH STÖCKLI

Slowly but surely, sport has come back to life in recent months. Many small and large events are taking place again, many also in front of an audience. Fortunately, and let's hope it stays that way! What remains are the challenges that the sport has to face. The months of the pandemic have created new difficulties for national and international federations, clubs and organizers, and perhaps accentuated existing ones. The market is fiercely competitive, competition is high, and resources – be it financial or human – are sometimes limited.

At the same time, more and more relevant topics from different areas of society are finding their way into sport. How can we promote gender equality in sports, for example. Or the view of political aspects in the awarding and organization of sport events. Personally, I find these developments extremely interesting. They broaden our horizons and our field of work. That is why I advise you, dear participants of the 2022 AISTS MAS Class, to see such challenges as an opportunity when you hopefully dive into the world of sport after completing the course. National and international sports need hungry sports managers. People who have followed current developments, who are able to deploy employees according to their skills and who know how to exploit the opportunities of digitalisation. This means you can make a highly tangible difference when it comes to developing an association or any sports organisation.

I am convinced that you made the right choice for your education with AISTS. You will see that your lecturers come from the field and bring with them the relevant experience and expertise from which you will benefit. The experts will sharpen your vision and show you how sport can evolve in an era of increasing digitalisation and globalisation. For this purpose, the city of Lausanne, with its internationality and as the headquarters of numerous sports federations, offers an ideal geographical starting point for your leap into the large, diverse world of sports.

From my own experience, I can tell you that there is something special about working for sports. In my eyes, we are doing valuable work here that is also important for future generations. I am glad that you also chose this route, and I wish you much success and joy for your course at the AISTS!

Ralph Stöckli

Head of Olympic Missions Swiss Olympic, Chef de Mission Beijing 2022

for the spirit of sport

FROM THE FIELD

THOMAS JUNOD

Adventure of a lifetime – When I discuss the AISTS MAS with its students and graduates, this Coldplay track immediately comes to mind. Because the course is more than just an education. It is an outstanding human adventure that only a chosen few get to experience each year.

How lucky you are to be able to spend a year of your lives studying sport in such depth, meet so many renowned experts and drink in their knowledge while forming your own minds.

What a joy to be able to spend a year with other sports enthusiasts from all over the world, as part of a melting pot of cultures and experience. As you will see, much of the knowledge and skills you gain during your course will come from your fellow students!

What a privilege to spend a year in Lausanne, the Olympic Capital, and come into contact with so many international sports federations. There are countless possibilities for networking outside of class and a large number of events you can attend, provided you are curious and know how to seize opportunities as they present themselves.

And what an honour to join such a prestigious training programme, with multiple partners, on the magnificent UNIL and EPFL campuses. This is a wonderful setting to reflect and put your grey cells to work, but also to do some sport!

What a great chance you have, but what a responsibility too! Because, while sport enables people all over the world to dream, it does so on the basis of its strong values: universality, respect and leading by example. It is these values that you, as future managers, will be responsible for upholding. Even more than communication, marketing, law or technology, good ethics is what will help you to mould your thoughts and actions. Because, if we want sport to continue to work its magic and inspire future generations, we need to protect it and the values we hold dear.

So, to paraphrase slightly, “turn your magic on [...], everything you want’s a dream away. Under this pressure, under this weight, you are diamonds taking shape. If you only got this life, this adventure is for you!”
